**DANGEROUS ILLNESS OF GEN.  
SCHEMMELEFFEN.**  
Washington, Aug. 29.  
General Schemmeleff is at the point of Death  
in Philadelphia.  
An interesting report has been received at the  
Freedmen's Bureau from Col. S. M. Jones, As-  
sistant Commissioner of Mississippi, dated Vicks-  
burg, August 15. It contains the following ac-  
count of affairs in that State:  
The railroad are being rebuilt and bridges re-  
paired. The telegraph lines are being extended  
to the cities and towns in the interior of the State,  
and in a short time communication will be easy  
and rapid.  
The freedmen working on the road assigned  
them at Davis' Bend and Camp Hawley, near  
Vicksburg, are all doing well. Their crops are  
maturing, and as harvest time approaches, the  
number of rations issued is reduced, and they are  
compelled to rely upon their own resources.  
At least 10,000 bales of cotton will be raised  
by these people, who are raising crops on their  
own account.  
The number of idle people around them is  
constantly decreasing, as labor is abundant and  
good wages are offered for all kinds of work.  
The Treasury Department has turned over to  
the Bureau all lands, houses and improvements  
held by them. This includes houses in Vicksburg  
and Natchez, which were being rented from  
month to month.  
Not less than 50,000 people are cutting wood  
for steamers on the Mississippi river, and more  
people are engaged in the business than ever be-  
fore.  
The total number of freedmen in the State is  
estimated at 316,000, of whom only 30,000 are  
receiving assistance from the Government.  
New Orleans, August 29.  
Cotton quiet. Sales of 1,100 bales at 42c.  
Sugar and Molasses dull.  
Gold 143 1/2.  
Halifax, Aug. 31.  
The steamer Africa, from Liverpool, the 19th,  
via Georgetown the 21st, has arrived with two  
days late news.  
Nothing had been determined in regard to the  
Atlantic cable.  
Capt. Anderson, of the Great Eastern, in a let-  
ter says it will require ten months to provide  
proper gear for the cable, and to make necessary  
repairs to the Great Eastern. He suggested that  
the new cable should be made and laid in May  
next, and the old one be then picked up and re-  
paired. He has every confidence in the future  
success of the cable, but thinks it useless to re-  
new the attempt to lay it during the winter  
months.  
The St. Lawrence Canal was opened on the 17th inst.  
A vessel laden with coal passed from the Medi-  
terranean to the Red Sea.  
VERY LATEST.  
Liverpool, Aug. 30.  
Cotton—Said yesterday (5 days) amounted to  
15,000 bales.  
The bread-stuff market is dull and nominal.  
The weather has been favorable for crops.  
Provisions dear.  
Produce steady.  
New York, August 30.  
A Savannah special of the 29th, to the Herald,  
says:  
There has been no news of importance.  
General Brown has issued orders to his offi-  
cers to delay the expense of cleaning the  
streets. He has also ordered that all arms and  
ammunitions belonging to the Government be  
turned over to the Quartermaster.  
Business is reviving in Savannah. Two thou-  
sand three hundred bales of cotton arrived during  
the week ending August 30th.  
Raleigh, N. C., August 31.  
Lieut. A. M. Bates, on special duty of an im-  
portant character, in the Department of Virginia,  
has arrived here from a trip through the north  
eastern portion of this State, where there is no  
military force. He reports that three negroes  
were shot the other day by the home guards or  
county police, for refusing to return to their  
masters after accepting of employment else-  
where. The people refuse to recognize the free-  
dom of the blacks, who are whipped and tor-  
tured in the most fiendish manner, nor men ex-  
pressing a desire to be free. Shooting and kill-  
ing these creatures appears to be the order of  
the day. He also says a Union man in Halifax,  
was driven from his home for employing a col-  
ored man for his servant, without consulting the  
former master. A perfect reign of terror exists  
in that portion of the State, on account of the  
absence of the military.  
New York, August 30.  
The steamer Pennsylvania, which arrived yester-  
day from Liverpool, brought the large num-  
ber of 890 passengers. This is believed to be  
the largest crowd ever brought in one steamer.

**FINANCIAL AND COMMERCIAL.**  
**PETROLEUM MARKERS.**  
OFFICE OF THE MORNING HERALD,  
Titusville, Wednesday Eve., August 30, 1865.  
The business of today represents about the  
average amount transacted for the past week.  
The extreme scarcity of barrels in which to ship  
the oil brought forward is exercising a great in-  
fluence in the market. To obviate this difficulty  
we notice that some of the shippers are tanking at  
the platform here and thus using the same bar-  
rels every trip. The cause of this scarcity is we  
understand owing to the refusal of the Railroad  
Company, in many instances, to transport the  
empty on account of the excess of heavy freight.  
A railroad from Union is an event to be most  
earnestly hoped for by all Titusvillians. As the  
case now stands the oil trade at this point must  
cease to be anything of importance or greater  
facilities for transportation must be created. The  
plank road between this place and Pithole is pro-  
gressing very slowly and the work is causing  
much dissatisfaction among those most interest-  
ed in an early completion. Meanwhile the rail-  
road from Oil City to Pithole bids fair to divert  
the shipments of that section into this new chan-  
nel. It is evident that unless the people of Titus-  
ville awake to a realizing sense of what their in-  
terest demands, their prejudice for a railway, not-  
withstanding the central location, will vanish on  
the completion of the works of improvement,  
designed by their go-ahead neighbors.  
The receipts and shipments for the day are as  
follows:

**OIL PUMP**  
**AND GAS EJECTOR.**  
We have just completed arrangements with the  
invention of this improved pump for the in-  
jection into the oil regions of (containing)  
This pump is double acting, throwing the oil  
both up and down strokes of the piston,  
and producing nearly double the amount of oil  
from the same pump. It also requires less  
power than the common pump to produce a  
greater amount of oil. The  
**OUTER BARREL**  
furnishes an escape for the surplus gas and thus en-  
ables the pump to work without being affected  
thereby, and thus saves the breaking of piston rods  
destroying valves, bursting up and bags and in-  
jury by the force of the gas. The section or shaft  
of these pumps is not only much greater than that  
of any other pump, but is also  
**CONTINUOUS.**  
Not broken or checked by the DOWNWARD  
STROKE OF THE PISTON, and has a power to  
draw the oil from the cave as soon as the well un-  
derneath has been put in operation, and is the  
only pump to the low price of it. It is in the  
oil region the price of these pumps for the present from  
\$500 to \$750.

**The Indians.**

The conflict between the Government troops and the Indians, out West, still rages, and a spirit of exasperation seems to animate both parties. The extermination of the race seems to be the only solution of the problem which their presence creates. They seem incapable of submitting to the rule of the white man, and exhibit a sullen desperation which prefers annihilation to submission. They were a people with many redeeming characteristics, and have been made the theme of romance and poetry by many of the most talented contributors to American literature. Yet their fate excites no commiseration, and we hear of no party organized to secure them justice or a chance to participate in the benefits of our civilization. The reason is, that they are not available as political capital, and nobody can get into office by advocating their claims. If they were more numerous than they are, and had a chance of securing the right to vote, we would have an Indian bureau to take care of them, persons to preach for them and hosts of sentimental old maids to teach the little papooses the laws giving them an inheritance in the soil. As the matter stands, the only civilized agency applied to them is the rifle, and their possessions consist of the hunting grounds on the other side of Jordan.

**Still They Come.**

Over 17,000 passengers have landed in New York since the 1st instant. Of this great number several hundred immediately departed for Richmond and other cities in the Southern States, where they intend engaging in farming. Among these were 200 Swedes, utterly ignorant of our language; they can still render essential service in tilling the soil. About 200 Swiss and Polish passengers have recently arrived, and thousands more are expected. These persons leave their native land, many of them in exile for political offences, and they seek our hospitable shores to escape the tyranny under which they have long bowed. They have, as a general thing, no money, but seem to show a laudable spirit in at once seeking employment. In this they very seldom fail, for if they are not needed here, there are plenty of avenues already opened and yet to open in the South and West. No man need be long idle if he diligently seeks employment.

A man named Harrington, in New Bedford, lately went to an undertaker, selected a coffin for his wife, borrowed some money until the bank opened next morning and absconded. The undertaker found Mrs. Harrington alive when he went to measure her for her coffin, and that he was somewhat out of pocket by the order.

The Methodist society of Brookfield have commenced to build a new house of worship in the centre of the town. The estimated cost of the building is from \$10,000 to \$12,000.

A Catholic curate at Seville, Spain, denounced electric telegraph, railways, and the substitution of steam power to hand labor, as "the devilish devices of Satan to aid Protestants in the perversion of modern society."

A Saratoga correspondent says: "So far as heard from, the matrimonial market stands thus: Old stock married off, none; old stock hopeful of success, 1; widows of first class married, or soon will be, 10; widows of second class married or soon will be, 15; young ladies married, 17; engaged and day fixed for wedding, 95; betrothed, and gone to get consent of paternal majesties, 67; still biding and cooing, 60; matches broken up by stern parents, 11; come together again, 3; but not reciprocated, 37 1-2; no one to love, 49; elopements, 1; private marriages, 2.

The other day, a lady was examining the fine shawls and cloaks upon the life size frames in a store in Hartford, and finally found a silk cloak which pleased her very much, and she raised it up, examined it carefully and freely, and was at the conclusion very much astonished to find that she had been making free with the dress of a lady customer who very quietly stood as still as a stily figure, till all the trimmings of her dress had been well examined.

The Boston Transcript says: "In the last Independent, the editor of that paper is called all sorts of flattering names, and is mentioned as one 'who to-day stands in the foremost rank of American editors, poets, and popular orators.' Fine speaking in Worcester yesterday," said a certain old playmate to another person in the street. "Ah, you don't say so!" "I do," replied the other, "and I do, every week."

**THE MOST DIRECT ROUTE TO BUFFALO**

Is by way of the A. & G. W. R. R. from CORTY to JANI STOWN, via CHA. TAQUA LAKE by Steamer to MAYVILLE, and by Coach to Westfield, (distance 41-2 miles) at Westfield you strike the Lake Shore Road and get the same train which you would if you went by Erie, and avoid lying over at Erie two or three hours.

To come to the Steamer going East, you want to take the 2:15 A. M. train at Corty. To connect with the Steamer returning from Buffalo, come West, you want to take the 1:25 P. M. Train on the Lake Shore Road, as far as Westfield. You can run at Jamestown at 8:50 P. M., in time to connect on the A. & G. W. going West.

THIS ROUTE Is but little known by the public generally, as yet consequently travelers have their doubts as to facilities and making connections for Buffalo. Enquire at the Ticket Office of the A. & G. W. R. R. at Corty, or at the Ticket Office at Buffalo of the Lake Shore R. R.

The traveler by taking this route, makes of it a PLEASURE TRIP. You get a variety—have a chance to move about get a view of the best scenery on the Western Lake. Also, you can say that you have sailed on the highest and most beautiful water by steam in the world. The Lake is 700 feet higher than Lake Erie.

CONNECTIONS MADE WITHOUT FAIL. The Steamer will make two Extra Trips on Wednesday, 1st, each week for Excursion Parties and the public generally. Leave Jamestown on the arrival of the Corty Accommodation Train 10:15, A. M. Leave Mayville, returning at 1 P. M. Leave Jamestown on the second trip at 3:15 P. M., return to Mayville at 5 P. M. Leave one hour for the round trip, in this day only. The steamer will run extra trips on any day of the week except Sundays, by parties giving notice nine days in advance and furnishing at least 25 persons.

The Lake is 2-1/2 miles long, from 600 feet to 1 mile wide, and from 4 to 50 feet deep. August-1st

They are connected with the BOILER either by a bed plate, or by saddles, as may be desired. There are no extras, but included are, PUMP, HEATER, GOVERNOR, SAFETY VALVE, STEAM GAUGE, SUCTION PIPE, SMOKE PIPE, &c. The Piston Rod is of STEEL, the Crank of Wrought Iron and extra heavy.

Every bolt is turned, and hole reamed out. The Pump is attached to the Cylinder, and is so arranged that by a simple adjustment it can be prevented from freezing. The Governor is Pickering's Patent, which gives great uniformity of motion. The Boilers are made of the best PENNSYLVANIA CHARCOAL IRON-SHELL 1-4 inch, and Fire Box 5-16 inch thick and are subjected to a cold water pressure of 130 pounds before leaving the Works.

They are adapted for burning either coal or wood, dry or green. The water passes from the HEATER into the BOILER at the heating point. In estimating CAPACITY, 14 FEET of heating surface per horse power is allowed.
